About All Earth Group

HISTORY Over the years All Earth Group Pty Ltd has undergone many transformations to become the strong business that it is today. As a fully West Australian owned company, it is operated by its owners. This has enabled the company to provide a dedication and diligence predominantly found in owner operated businesses. With beginnings primarily in the earth moving industry, this company has expanded its operations to include a waste transfer and recycling facility in Perth's Eastern Suburbs.

EXPERIENCES Over the years All Earth Group Pty Ltd has enjoyed a vast array of experiences. These experiences have seen All Earth Group Pty Ltd providing environmental, logistical, development and supply solutions to its clients throughout WA, to both the private and public sector. All Earth Group Pty Ltd has been involved in projects large and small from deliveries of materials to private residence to the provision of plant, materials and bulk haulage to some of Perth's major and high profile projects. Repeat business gained from Local Government, developers and major civil contractors is testimony to the quality and value of the services and materials provided.

SYSTEMS All Earth Group Pty Ltd recognises the importance of well-planned, documented and implemented management systems. These systems must effectively contribute to decreasing the likelihood and/or preventing accidents in the work place, improving productivity and eliminating costly rework. As such, All Earth Group Pty Ltd has a

well documented system that covers all aspects of occupational health and safety including job safety analysis, contractor procurement, project quality management and equipment maintenance.

PEOPLE All Earth Group Pty Ltd's directors work closely in the operation of this business. Paul Tarzia manages the operations of the waste transfer station and Local Government relationships; Vince Tarzia manages the external operations including project and business development whilst Heidi Dauth manages administration, finance and systems of the company. These three are supported by an efficient team of people individually chosen for their commitment, skills and attitude.

FUTURE Our vision is to further establish All Earth Group Pty Ltd as a leader in the market of quality recycled and new construction and landscaping materials, logistical solutions, environmental rehabilitation, earthworks and property development. Our clients value the efficiency gained and reduction of costs realised when dealing with one supplier for all their needs. If you have any needs that are not contained within our profile, please approach us, as we are always devoted to meeting the requirements of our client's.

Our Services

◀ **dig** The secret to the success of All Earth Group Pty Ltd is the synergy between the various services, materials provided and the companies experience in the earthmoving and plant hire industry. All Earth Group Pty Ltd boasts a large fleet of front end loaders, water carts, excavators, screening plants and crushers. All Earth Group Pty Ltd has been systematically upgrading it's equipment to newer models over the last few years. This plant is hired on a wet or dry basis or is packaged to create a complete service.

◀ **move** From 1 meter to 1 million and beyond, All Earth Group Pty Ltd is able to meet all bulk haulage needs. The company's own tippers are complimented by over eighty subcontractors and hauliers of all configurations. Contractors are inducted into the company's requirements prior to engagement. This ensures that all contractors are adequately insured and understand the company's expectations in relation to Occupational Health and Safety, administration and customer service. The size of the fleet operated enables All Earth Group Pty Ltd to quickly and flexibly respond to the ever-changing needs of the client.

◀ **recycle** All Earth Group Pty Ltd recycles inert and green waste materials at our client's site's or at our facility on Kelvin Rd Maddington. Materials can be delivered directly to the waste transfer station or we can reduce your total cost by picking your waste materials up in our bulk tippers. All Earth Group Pty Ltd has a publicly registered weighbridge at Maddington, ensuring the accuracy of your accounts.

All materials received at the waste transfer station are meticulously sorted to ensure the maximum retention of materials that can be recycled. Statistics are monitored monthly, with current figures showing a 75% diversion from land fill rate. That's over 100,000 cubic meters of material that we prevent from going to landfill each year, and we are continuously improving our methodology to improve this rate. We can provide our clients with regular statistics to enable them to demonstrate their commitment to a sustainable future.

◀ **supply** All Earth Group Pty Ltd are market leaders in the supply of new and recycled landscaping and construction materials.

The recycling concept is not complete until a recycled product is used. We pride ourselves on our ability to process unsuitable materials with a focus on producing quality landscaping and construction products. These include fill sands, topsoils, mulches, roadbase, track materials and drainage materials. Our roadbase materials meet MRWA specifications, demonstrated by regular testing of the material.

To complete our material supply capabilities, we have also formed strong relationships with suppliers of virgin materials. This enables us to offer our clients a wide choice of materials at competitive rates.

Our Products

These materials are available for pick up at our facility or delivered:

- Crushed concrete MRWA specs roadbase
- Crushed concrete drainage material, 20/50mm, 20mm and 60/100mm.
- Crushed bitumen.
(Excellent alternative for track material or hardstand)
- Deep fill materials
- Clean sand
- Recycled sand
- Top soil
- Brickies sand
- Mulch (enviro and jungle)

In November of 2007 All Earth Group Pty Ltd launched a brand new Garden Supplies facility. This facility provides a much wider range of landscaping and construction materials and a facility for the disposal of domestic garden/household waste. This facility is open 7 days per week and is focused on the domestic and small business market.

This is the only facility in Perth that can accept waste and provide quality new and recycled products at the one location. Material can be picked up or delivered 7 days per week.
